Arjun Sharma

Karnal, Haryana, IN | arjun251898@gmail.com | +91 7027241898 | GitHub | LeetCode | Portfolio | LinkedIn

Computer Science undergraduate with hands-on experience in full-stack web development, Data Structures & Algorithms, and the MERN stack, focused on building scalable software and real-world applications using modern technologies.

Education

Chitkara University, Rajpura, Punjab, IN — Expected Aug 2028
Bachelor of Engineering in Computer Science and Engineering — ***CGPA: 8.82 / 10***

Sant Gyaneshwar Model School, Alipur, Delhi — 2024
Senior Secondary Education – CBSE

The Millennium School, Karnal, Haryana — 2022
Secondary Education – CBSE

Experience

Web Development Intern — SkillOrbit *(Remote)* — Mar 2026 – Apr 2026

- Completed an intensive, cohort-based web development program through live instructor-led sessions covering front-end (HTML, CSS, JavaScript, React) and back-end (Node.js, Express) fundamentals, along with database design principles.
- Applied program concepts to hands-on web development projects, building functional UI components and RESTful backend routes while practicing Git-based version control throughout.

Projects

SkillLens AI | *Node.js, Express.js, MongoDB, JWT, Google OAuth, Gemini & Groq AI* | GitHub

- Built a full-stack AI interview-prep platform with resume ATS scoring, HR/technical mock interviews featuring live voice analysis, and gamified progress analytics powered by multimodal Gemini and Groq integrations.
- Architected secure REST APIs with JWT and Google OAuth authentication and MongoDB data models across a modular frontend, supporting real-time speech evaluation and role-based admin controls.

FlexStore DB | *Node.js, Express.js, TypeScript, HTML, CSS* | GitHub

- Architected a schema-flexible JSON document database with a layered Storage → Collection → Database engine, decoupling REST routes from persistence through a typed `StorageEngine` interface.
- Designed engine-owned document identity and metadata with ID generation, versioning, and timestamps, enforcing strict TypeScript contracts across the core for future indexing, transactions, and SDK extensions.

Certifications

- Cybersecurity for Everyone — Coursera
- Introduction to Blockchain Technologies — Coursera
- Data Visualisation: Empowering Business with Effective Insights — Tata (Forage)
- AI and Disaster Management — DeepLearning.AI

Technical Skills

Languages: Java, C++, C, Python, JavaScript, TypeScript
Frontend: React, HTML, CSS, Vite
Backend: Node.js, Express.js, Spring Boot, REST APIs, JWT
Databases: MongoDB, MySQL
Core CS: Data Structures & Algorithms, OOP, DBMS, OS, CN, System Design
Tools: Git, GitHub, Linux, VS Code, Postman, Vercel
